Freight Partners Move Closer to Signing as GRDA Issues Off-Taker Agreements Following Mpakadan Road Show

August 20, 2026 — Accra

Following the recent commercial road show along the Tema–Mpakadan Railway Corridor, the Strategic Initiatives and Business Development Directorate has held follow-up engagement meetings with Integrated Service Solutions (ISS), AskRaf International Company Limited, and MEDLOG Transport & Logistics to advance discussions toward formal freight off-take arrangements.

All three companies comprising freight forwarders and a logistics operator active in Ghana's cross-border trade corridor have expressed strong interest in the corridor following the road show, citing the operational readiness and commercial potential of rail as an alternative to road haulage for containerized cargo moving between Tema and Mpakadan.

In response, GRDA has formally issued its Rail Freight Off-Take Agreement to all three companies for review. The agreement sets out the commercial and operational terms governing container haulage on the corridor, and each company is now expected to study the terms internally ahead of finalizing its decision and proceeding to signing.

Companies engaged and current status:

- Integrated Service Solutions (ISS) - freight forwarder; off-take agreement issued, under review
- AskRaf International Company Limited - freight forwarder; off-take agreement issued, under review
- MEDLOG Transport & Logistics - logistics operator; off-take agreement issued, under review

The Directorate will continue to engage all three companies through the review process, with the goal of concluding signed off-take agreements that translate the strong commercial interest generated by the road show into confirmed freight volumes on the Tema–Mpakadan Corridor. This progress reflects the growing momentum behind GRDA's freight commercialization strategy and its drive to position rail as a competitive, revenue-generating mode for Ghana's port and cross-border trade.
